Xanita Board

Xanita Board is a lightweight, UV inkjet printable board that is strong with a high crush strength core, non-toxic (no VOCs), direct printable, flat pack, and is 100% repulpable/recyclable. It is not cardboard or timber, but is made from post-consumer recycled cellulose fibers such as Kraft cardboard boxes.

Xanita Board is ideal for exhibits, tradeshow, 3D signage, point-of-sale displays, pop-up shops, end caps, ceiling beams and bulkheads, exhibition furniture, and more. It will allow Brands to move from what they do now, to high impact 3D structural applications.
